-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Specification*

1. The specification is objected to because the patent number 6,736,614 is missing in page 3 of the specification. Appropriate correction is required.

### *Double Patenting*

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A **timely filed terminal disclaimer** in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 2-28 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-27 of U.S. **Patent No. 6,736,614**. Although the conflicting claims are not identical, they are not patentably distinct from each other because the limitations recited by the claims of the instant application are contained and clearly anticipated by the claims of the patent. Therefore, the claims of the patent anticipate the claims of the instant application. For instance, claim 3 of the instant application recites a reciprocating drive mechanism comprising the following elements: a housing, a cylinder, stator permanent magnets, a piston, and an electromagnetic drive. While claim 1 of the patent '614 recites a reciprocating drive mechanism comprising the following elements: a housing, a cylinder, stator permanent

Art Unit: 3746

magnets, a piston, and an electromagnetic drive. Thus the elements recited by claim 3 of the instant application are contained within claim 1 of the patent'614. Therefore, claim 3 of the instant application is anticipated by claim 1 of the patent'614. The same analysis applies for the remaining claims (see below).

| <b>Instant application claim</b> | <b>Double patenting with</b> | <b>Claim in patent'614</b> |
|----------------------------------|------------------------------|----------------------------|
| 2                                |                              | 2                          |
| 4                                |                              | 4                          |
| 5                                |                              | 5                          |
